DESCRIPTION OF DUTIES/ESSENTIAL FUNCTIONS

Provides engineering assistance in identifying, evaluating, managing and rehabilitating various systems and facilities. Performs and reviews engineering computations. Review, research, analyzes and prepares various records, reports and other data. Conducts field studies and inspections. Prepares plans and specifications. Investigates general public inquiries and prepares responses. Develops and designs new layouts, drawings, etc. Maintains and monitors facilities and systems. Applies appropriate operating procedures to enhance functioning of facilities and systems. Coordinates the design, development, evaluation and implementation of multi-engineering disciplines to improve operations, procedures and systems. Duties include the preparation and evaluation of various drawings, reports, designs and test data for various Capital Improvement Projects (CIP) in the Engineering Branch (i.e., Water, Wastewater, Street & Bridge, Neighborhoods and Stormwater sections). Coordinates the planning and implementation of design and construction projects. Prepares correspondence such as letters, interoffice memoranda, reports, etc. Coordinates and plans improvements with various departments, outside agencies and civic associations.

10

WORKING CONDITIONS
